

ROI SHIKLER

Senior AI Product Manager

Ramat Gan, Israel · +972-52-607-1699 · roishik10@gmail.com · [Linkedin.com/in/roishikler](https://www.linkedin.com/in/roishikler) · roishikler.com

Engineer and researcher turned product manager, taking complex B2B AI platforms from 0→1 at early-stage startups. M.Sc. in Computer Vision (Technion) with hands-on ML/DL depth; now combines technical fluency (APIs, cloud, AI/ML) with end-to-end product ownership — from discovery and customer engagement through GTM launch — bridging Engineering, Design, and business to drive adoption and scale.

PROFESSIONAL EXPERIENCE

BAND | Senior AI Product Manager - Founding Team 2025 – Present

- Founding PM at an early-stage B2B AI startup — led 0→1 product strategy and GTM execution, taking a secure platform from zero to first paying enterprise customers across PLG and direct sales.
- Owned the full product lifecycle — from discovery and customer engagement through PRD, launch, and adoption — bridging Engineering, Design, and external stakeholders at every stage.
- Built the Python & TypeScript SDKs, the developer console UI/UX, an open-source MCP server, and all technical documentation.
- Shipped 16 integrations with leading agent frameworks (LangGraph, CrewAI, PydanticAI), with hands-on technical depth across REST APIs, WebSocket, and multi-agent pipelines.

Mobileye | Algo Product Manager - AV Department 2023 – 2025

- Owned product for 3 algorithmic R&D teams across the autonomous-parking stack — classic CV, hybrid CV + deep learning, and end-to-end neural pipelines.
- Established KPIs, evaluation criteria, and benchmarks across teams — translating real-world performance data into disciplined release decisions and shared success metrics.
- Led customer-facing technical validation with global automakers — Zeekr, VW, Stellantis, Ford, Audi, GM, BMW, Mahindra — directly engaging enterprise customers from problem framing to deployment.

DDR&D (MAFAT) / IMOD | Product Owner - MAFAT R&D 2022 – 2023

- Owned product for complex hardware-and-software AI and signal-processing R&D systems in a high-stakes, regulated environment.
- Shaped multi-year roadmaps across government, industry, and academia — an ecosystem spanning the Technion and Tel Aviv University, primes like Elbit and Rafael, and startups such as Prisma Photonics.

Israel Air Force (IAF) | Researcher — AI Research (OFEK) & Diagnostics (MU22) 2017 – 2022

- Data scientist in the IAF AI research group (OFEK): built ML/DL models to detect and classify airborne objects, refined through field-feedback loops.
- Hands-on across the full model lifecycle — designed, trained, evaluated, and deployed SOTA ML, DL, and foundation models in resource-constrained, latency-critical environments.
- Earlier (MU22): systematic root-cause analysis of aircraft-system failures.

EDUCATION

Tel Aviv University | MBA, International Deep-Tech Program 2025 – Present

Focusing on the intersection of advanced technology, finance, and global business strategy.

Technion, Israel Institute of Technology | Master of Science (M.Sc.), Computer Vision 2015–2017

Thesis: 'Fractographic Image Analysis Using Computer Vision and Deep Learning Methods' — AI Lab, M.E. faculty.

Technion, Israel Institute of Technology | Bachelor of Science (B.Sc.), Mechanical Engineering 2012–2015

'Brakim' elite program | Robotics & Simulations specialty

COMMUNITY & ACTIVITY

Head of Xcelerate Entrepreneurship Program (XMAFAT) — Lead the entrepreneurship branch of the defense-R&D alumni network, building programs with VCs and government partners for veteran founders.

Mentor, 10Give (Technion Mentoring Program) — Mentor Technion students and early-career engineers.

Financial-education writer — Founder of the 'Ofekalkali' blog; write on technology and markets on LinkedIn.

Side projects — Exploratory builds across new stacks, from blockchain to generative-AI tools. github.com/roishik

SKILLS & LANGUAGES

Skills: B2B SaaS Product Strategy · AI-Native Product Development · Roadmap & Prioritization · Discovery, GTM & Customer Engagement · Cross-Functional Leadership · Technical Fluency (APIs, Cloud, AI/ML)

Languages: Hebrew (native), English (fluent).
